5. SERVICES OFFERED BY THE PORTFOLIO MANAGER (under the ambit of PMS License)

I. Investment objectives and policies

a) Discretionary Portfolio Management Services

Under the Discretionary Portfolio Management Services, the Portfolio Manager shall deploy Assets brought in by a Client by investing or divesting suitably in the capital markets as per the Act and Regulations. The Portfolio Manager shall be acting in a fiduciary capacity, as a trustee, with regard to the Client's account consisting of investments, accruals, benefits, allotments, calls, refunds, returns, privileges, entitlements, substitutions and / or replacements or any other beneficial interest including dividend, interest, rights, bonus as well as residual cash balances, if any (represented both by quantity and in monetary value).

Discretionary Portfolio Management Services shall be in the nature of investment management, and may include the responsibility of managing, renewing and reshuffling the portfolio, buying and selling the securities, keeping safe custody of the securities and monitoring book closures, dividend, bonus, rights etc. so that all benefits accrue to the Client's Portfolio, for an agreed fee structure and for a definite period as described, entirely at the Client's risk.

The Portfolio Manager shall have the sole and absolute discretion to invest on behalf of the client in any type of security as per executed Agreement and make such changes in the investments and invest some or all of the Funds in such manner and in such markets as it deems fit. The Portfolio Manager's decision (taken in good faith) in deployment of the Clients' account is absolute and final and cannot be called in question or be open to review at any time during the tenure of the Agreement or any time thereafter except on the ground of malafide, fraud, conflict of interest or gross negligence.

This right of the Portfolio Manager shall be exercised strictly in accordance with the relevant acts, rules and regulations, guidelines and notifications in force from time to time.

b) Advisory Portfolio Management Services

The Portfolio Manager will provide advisory portfolio management services, in terms of the SEBI (Portfolio Manager) Regulations, 2020 and SEBI (Investment Advisers) Regulations, 2013, which shall be in the nature of Investment Advice and may include advice relating to financial planning/asset allocation, investing in, purchasing, selling or otherwise dealing in securities or investment products, and advice on investment portfolio containing securities or investment products, whether written, oral or through any other means of communication for the benefit of the client.

Investment Advice shall be for an agreed fee structure and for a period hereinafter described, entirely at the Client's risk; to all eligible categories of investors who can invest in Indian market including NRIs, FPIs, etc.

The Portfolio Manager shall be solely acting as an advisor to the client without full discretion to make investment decisions. He shall not be responsible for the execution of decisions or administrative activities on the client's portfolio, unless requested to do so by the client via a Power of Attorney.

The Portfolio Manager shall act in a fiduciary capacity towards its Client and shall maintain arm's length relationship with its other activities. The Portfolio Manager shall provide advisory services in accordance with such guidelines and / or directives issued by the regulatory authorities and / or the Client, from time to time, in this regard.

Under both options, the Portfolio Manager will not be liable for losses incurred based on our advice.

II. INVESTMENT APPROACH/ PRODUCTS OFFERED (DISCRETIONARY PMS)

Investment Approach and Investment Objective

We only follow one strategy named "**PRUDENCE**" where we invest in companies that have strong tail winds for growth, have a quality franchise and are available at a reasonable valuation. (Quality at a fair price). Mr. Manish Gupta will be the dedicated, qualified portfolio manager. Our investment approach is elucidated below

GROWTH	QUALITY		VALUATION	RISK
	RIGHT TO WIN	MANAGEMENT		
Earnings <u>Growth</u> – Compounding stories • Size of opportunity • Tail winds stronger than head winds • Secular, structural • Non dilutive	 Favourable industry structure and eco system Strengthening "moat" High ROCE Self financed growth - FCF generation No threat from disruption 	 Long term orientation Clear goals Capital allocation discipline Balance sheet discipline Past governance record 	 Permits 18-20% IRR For high PE entry multiples, adjusts for multiple decline Adjusts for where we are in earnings cycle Cash flow based metrics 	 What are we seeing that others are not? Position sizing

DIRECTION OF TRAVEL – Incremental ROCE

1. Growth

- In the long run, stock prices track earnings growth of a company. Hence, a business we would look to invest in should be scalable which means there should be a large and growing market opportunity
- We have a bias to look for themes which have structural tailwinds in place which ensures we are buying into compounding stories

2. Moat

- We prefer to invest into businesses which have the following characteristics:
 - High ROE and Cash Generation
 - Low capital intensity
 - Operating leverage (High Gross Margin, low fixed costs)
- The industry should have a favorable structure ideally few players and high barriers to entry
- Company we invest in has a competitive advantage which translates into a strong moat
- Focus do one thing well rather than diversify into multiple, unrelated businesses
- Management team should have a good track record of capital allocation and must be fair to minority interests

3. Valuation

- We are happy to pay a fair value (if not lower) for the businesses we shortlist using the above aspects because Quality is seldom cheap
- Fair valuation is a function of
 - Growth outlook, return on capital, cash flow
 - o Terminal value: strategic dominance
 - o Predictability, consistency of growth
- In addition to the earnings power of a business, fair valuation is also determined in context a function of the following two things:
 - Where are we in earnings cycle?
 - What is the time horizon for the investment?
- Finally, we strive to pay a valuation where we feel probability of capital loss over 3-5 years is close to zero

4. Risks

- While taking an investment decision, we try to be cognizant about all key risks associated with the given business model which could invalidate our investment thesis
- We broadly think about risks in following terms e.g. as an illustration (not an exhaustive list)
 - Earnings risk from collapse in volume or margins

- Multiple risk from reduction in earnings growth
- Capital allocation and governance risks
- Political/regulatory risks
- Risks associated with leverage in the business
- We may take exposure at entry, in a single company upto maximum of 15% of funds being managed.

Portfolio Construction

While our fundamental bedrock is investing in Quality companies, one must be cognizant of the fact that Quality companies are seldom cheap. Hence, one must be flexible when one sees companies which are not pristine quality but getting there (Small and Mid-Caps) or companies undergoing transformation because of mistakes being corrected.

We hence organize the portfolio around 3 buckets to give us maximum flexibility

Sub Category	Description	Minimum IRR expectation
Clear Leaders Secular	 Leader in growing market Robust business model 	12-18%
Emerging Leaders	Small and mid-caps that are on the path to become Clear Leaders	12-25%
Special situations	 Strong underlying franchise undergoing temporary challenges 	> 25%

Other considerations

- The key variable that affects returns is investor "behaviour" during euphoria and corrections
 - Keep at least a 5 yr. perspective
 - Don't invest in equities if you cannot handle volatility or see mark downs of up to 25% on the portfolio
- a. Clients should appreciate that no one approach works all the time and hence Solidarity would need some flexibility to deviate from the above strategy.
- b. We may choose not to be fully invested and will park surplus funds in Liquid Mutual funds, Liquid ETF's (Exchange Traded Funds) or hold them in cash
- c. No fund manager/strategy will outperform in every time frame.
 - Choose an approach that works for you, and then give it time

- Avoid changing strategies mid cycle
- d. Measure returns, delivered post-advisor/management/performance fees. A good outcome would be returns which are 3% above the Nifty50 over 5 years.

<u>Eligibility</u>

 Initial investment of Rs.2 Crores for each account opened with us or as may be specified by Portfolio Manager in accordance of the Regulations for the eligible investor. For Family Accounts – Minimum starting AUM is Rs. 2 crore across family accounts

We will not be invested in derivative products. We may sign up families as clients who have a listed business in which we make investments on behalf of other clients.

Description of types of securities e.g. equity or debt, listed or unlisted, convertible instruments, etc.

Listed equity and equity related securities of Indian Companies & units of Mutual Funds and other instruments as approved by SEBI from time to time.

Basis of selection of such types of securities as part of the investment approach

The Portfolio Manager aims to adopt a strategy of stringent stock selection process and a disciplined investing approach with a long-term focus. Holdings and the sectors will be tracked on a constant basis and rebalancing wherever necessary based on revised prospects and valuations will be undertaken.

Allocation of portfolio across types of securities

Underlying asset class will be equity. Securities shall be chosen amongst a wide spectrum of market capitalizations. Investment in liquid funds/fixed term papers will be made for liquidity purposes. However, from time to time on opportunistically basis, may also choose to invest in units of mutual funds, ETFs or other permissible securities/products in accordance with the Applicable Laws.

Benchmark

The Portfolio is benchmarked against the Nifty50

Basis of choice of benchmark

Most of the portfolio companies fall in the large-cap category based on market capitalization. Hence, Nifty50 has been selected as the benchmark for comparing performance.

Indicative tenure or investment horizon

We recommend to invest with us keeping in mind a 5-year time horizon

Risk associated with the Investment approach

Risk as stated above in the Investment approach.

III. The policies for investments in associates/group companies of the portfolio manager and the maximum percentage of such investments therein subject to the applicable laws/regulations/guidelines.

The Portfolio manager does not have any associate or group company.

IV. Distributors: The Portfolio Manager may (i) appoint channel partners/distributors to on-board the Client (ii) On-board the Client directly without intermediation of any channel partners/distributors. Further, fees or commission paid to the Distributors shall be only from the fees received by the Portfolio Manager from the client and not added over and above the fees mentioned in clause 10 of Disclosure Document.

6. RISK ASSOCIATED WITH PMS

GENERAL RISK:

Solidarity Advisors Private Ltd. does not give any assurance or guarantee that the intended investment objectives of capital appreciation will be achieved as investment in Securities (Equities, Gold equivalents, debt) are subject to market or other risks that could result in loss of capital. <u>Clients should invest in Equities through Solidarity Advisors Private Limited only if</u> they have both ability and willingness to take risk (tolerate loss of capital).

We strongly believe that the behaviour of an investor impacts the returns more than anything else as people tend to take wrong decisions at both extremes – optimism and pessimism

- History suggests that the probability of Capital loss is as high as 50% if a client's time horizon is one year or less. Hence, clients should NOT invest with us if their time horizon is lesser than 5 years.
- According to us volatility is a part of long-term investing and anyone who can't see markdowns of 25% on the portfolio is not suited for investing in equities
- Solidarity Advisors Private Limited does not guarantee or assure any return on investment, either of principal or appreciation on the portfolio or preservation of capital.

Examples of kind of risks your investments are exposed to, are detailed below.

- The past performance of the Portfolio Manager does not indicate his/her future performance.
- Risk arising from the investment approach, investment objective, investment strategy and asset allocation

- The PMS is subject to risk arising out of non-diversification at times, portfolios of individual Clients may be concentrated in certain companies / industries. The performance of the portfolios would depend on the performance of such companies / industries / sectors of the economy.
- If there will be any transactions of purchase and/or sale of securities by Portfolio Manager and employees who are directly involved in investment operations that conflicts with transactions in any of the Client Portfolio, the same shall be disclosed to the Client.
- There are no group companies of Portfolio Manager, therefore, disclosure of related services offered by Group companies is not applicable.
- The Portfolio Manager's investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends. The Portfolio Manager is neither responsible nor liable for any losses resulting from the operations of the portfolio Products.
- We may at times have a conflict of interest where we have invested in companies whose ownership or management control is with a client of ours. In order to protect client confidentiality, we may not be at liberty to disclose this conflict of interest to you.
- The liquidity of the portfolio investment is inherently restricted by trading volumes in the Securities in which it invests.
- Investments in general and in the Product / Services which the Clients / Investors have opted are subject to wide range of risks. Some of the risks arising from the investment objectives, investment approach and asset allocation are stated as under which inter alia also include:

a) Economic slowdown.

b) Volatility and illiquidity of the stocks.

c) Poor corporate performance, economic policies, change of Government and its policies.

d) Acts of god, acts of war, civil disturbance, sovereign action and such other acts

e) Geopolitical risks.

- Other risks including cancellation and postponement of settlements, default, legal actions, third party non-performance, misjudgement / incapacitation of the Portfolio Manager.
- The valuation of the Portfolio's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and

economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. There will be no prior intimation or prior indication given to the Client when the composition / asset allocation pattern changes.

- Trading volumes, settlement periods and transfer procedures may restrict the liquidity
 of the investments made by the Portfolio. Different segments of the Indian financial
 markets have different settlement periods and such periods may be extended
 significantly by unforeseen circumstances. The inability of the Portfolio to make
 intended securities purchases due to settlement problems could cause the Portfolio
 to miss certain investment opportunities. By the same rationale, the inability to sell
 securities held in the portfolio due to the absence of a well-developed and liquid
 secondary market for debt securities would result, at times, in potential losses to the
 Portfolio, in case of a subsequent decline in the value of securities held in the Portfolio.
- Interest Rate Risk: As with all debt securities, changes in interest rates may affect valuation of the Portfolios, as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than prices of short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the valuations of Portfolios.
- Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.

• Grievance redressal and dispute settlement mechanism

The aforesaid personnel of the Portfolio Manager shall attend to and address any Client query/concern/grievance at the earliest. The Portfolio Manager will ensure that this official is vested with the necessary authority and independence to handle client complaints. The aforesaid official will immediately identify the grievance and take appropriate steps to eliminate the causes of such grievances to the satisfaction of the client. Effective grievance management would be an essential element of the Portfolio Manager's portfolio management services and the aforesaid official may adopt the following approach to manage grievance effectively and expeditiously:

- **1.** Quick action- As soon as the grievance arises, it would be identified and resolved. This will lower the detrimental effects of grievance.
- **2.** Acknowledging grievance- The aforesaid officer shall acknowledge the grievance put forward by the Client and look into the complaint impartially and without any bias.
- **3.** Gathering facts- The aforesaid official shall gather appropriate and sufficient facts explaining the grievance's nature. A record of such facts shall be maintained so that these can be used in later stage of grievance redressal.
- **4.** Examining the causes of grievance- The actual cause of grievance would be identified. Accordingly, remedial actions would be taken to prevent repetition of the grievance.
- 5. Decision-making After identifying the causes of grievance, alternative course of actions would be thought of to manage the grievance. The effect of each course of action on the existing and future management policies and procedure would be analyzed and accordingly decision should be taken by the aforesaid official. The aforesaid official would execute the decision quickly.
- **6.** Review After implementing the decision, a follow-up would be there to ensure that the grievance has been resolved completely and adequately.

Any unresolved dispute between Solidarity Advisors Private Limited and the client shall be settled through arbitration as per the arbitration and conciliation act. The Portfolio Manager shall attend to and address any client query or concern as soon as possible to mutual satisfaction. All disputes, differences, claims and questions whatsoever which shall arise either during the subsistence of the agreement with a client or afterwards with regard to the terms thereof or any clause or thing contained therein or otherwise in any way relating to or arising there from or the interpretation of any provision therein shall be, in the first place settled by mutual discussions, failing which the same shall be referred to and settled by arbitration in accordance with and subject to the provisions of the Arbitration and Conciliation Act, 1996 or any statutory modification or re-enactment thereof for the time being in force. The arbitration shall be held in Mumbai and be conducted in English language.

The agreement with the client shall be governed by, construed and enforced in accordance with the laws of India. Any action or suit involving the agreement with a client or the performance of the agreement by the either party of its obligations will be conducted exclusively in courts located within the city of Mumbai in the State of Maharashtra.

• SEBI SCORES platform

SEBI has launched a centralized web-based complaints redress system (SCORES), which enable investors to lodge and follow up their complaints and track the status of redressal of such complaints from anywhere. This also enables the market intermediaries and listed companies to receive the complaints from investors against them, redress such complaints and report redressal. All the activities starting from lodging of a complaint till its disposal by SEBI would be carried online in an automated environment and the status of every complaint can be viewed online at any time. An investor, who is not familiar with SCORES or does not have access to SCORES, can lodge complaints in physical form. However, such complaints would be scanned and uploaded in SCORES for processing.
