ABOUT US

About us

- Boutique Equities firm
- ~1500 Cr AUM, ~160 families
- Private, independent ownership (CIO and close friends)
- Team incentivized as owners - 25% of PBT shared

Desired outcome

- Seeking 15% IRRs post fees AND 1.5% Alpha over BSE500 TRI every rolling 5 years under assumption of 11% nominal GDP growth (no guarantees)
- Never risk ruin despite promise of very high upside.

OUR GUIDING PRINCIPLES

1. Be mission driven. Profits with purpose.
2. Disciplined process that focuses on superior long-term outcomes. Path to long term outcomes via resilience over speed
3. 100% alignment of interests. Clients come first.
4. Radical transparency via Quarterly Letters and Calls
5. Build culture that emphasizes radical candour and accepts mistakes.

THERE ARE MULTIPLE APPROACHES TO INVEST IN EQUITIES

Compounding stories at a fair price which we are willing to hold for long time horizons

“At the right price, everything is “AAA”.

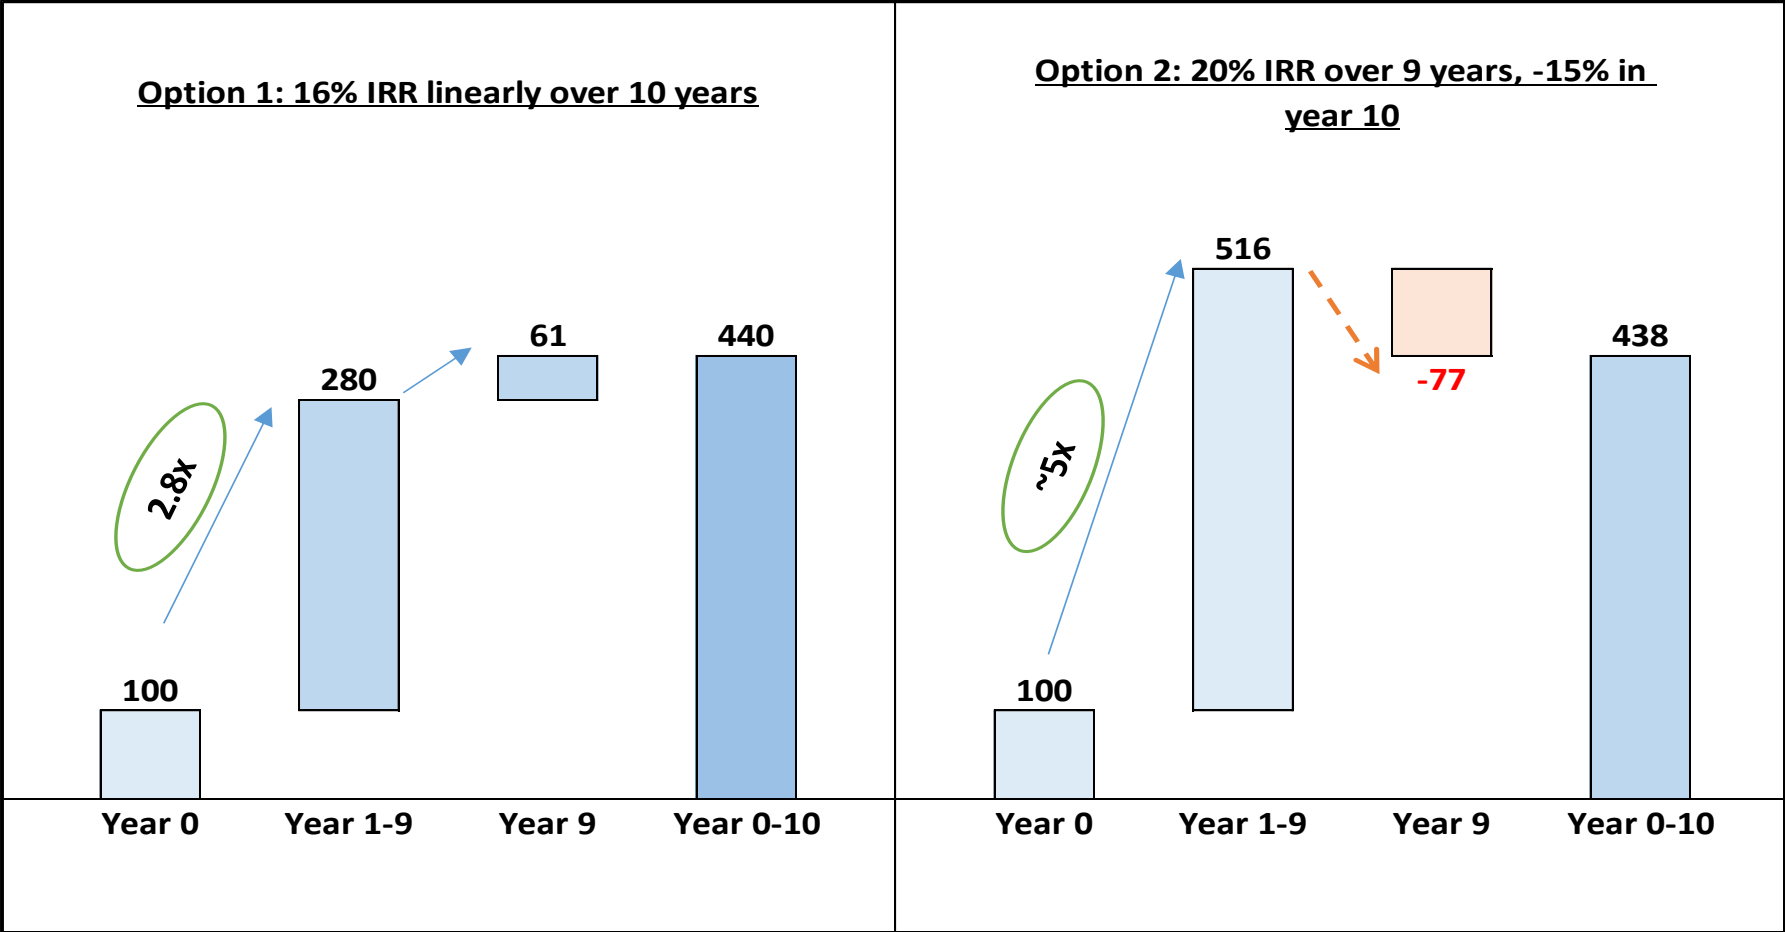

Long term is 5- 10 years

Long term is 1 yr

All choices have trade offs. Opportunism does not pay in long term

WE SEEK PORTFOLIO RESILIENCE OVER SPEED ...

... VIA HIGH PROBABILITY EPS/FCF COMPOUNDING

Over the long term, stock prices are slaves to earnings.

Hence, we aim to buy resilient growth stories that can compound earnings for long periods of time, at a broadly fair entry price

Think like owners. Exit when valuations euphoric

WE WILL NEVER RISK RUIN FOR PROMISE OF HIGH RETURNS

KEY ASPECTS OF OUR PROCESS

Buying
decision

Is this a company we would like to own for long periods of time?

What is its role in the portfolio? Stability (Dravid) or growth kicker (Rishabh)

What is a broadly fair entry price for the quality and its stage of evolution?

What is the right position size basis expected IRRs?

Sell decision

Hold, trim or sell?

CAN THIS COMPANY COMPOUND EARNINGS FOR LONG PERIODS OF TIME?

- Favourable industry structure
- Sector/niche Leadership
- Edge/competitive differentiation
- Ability to re-invest for growth (ROE > 15%)
- Better business today than yesterday

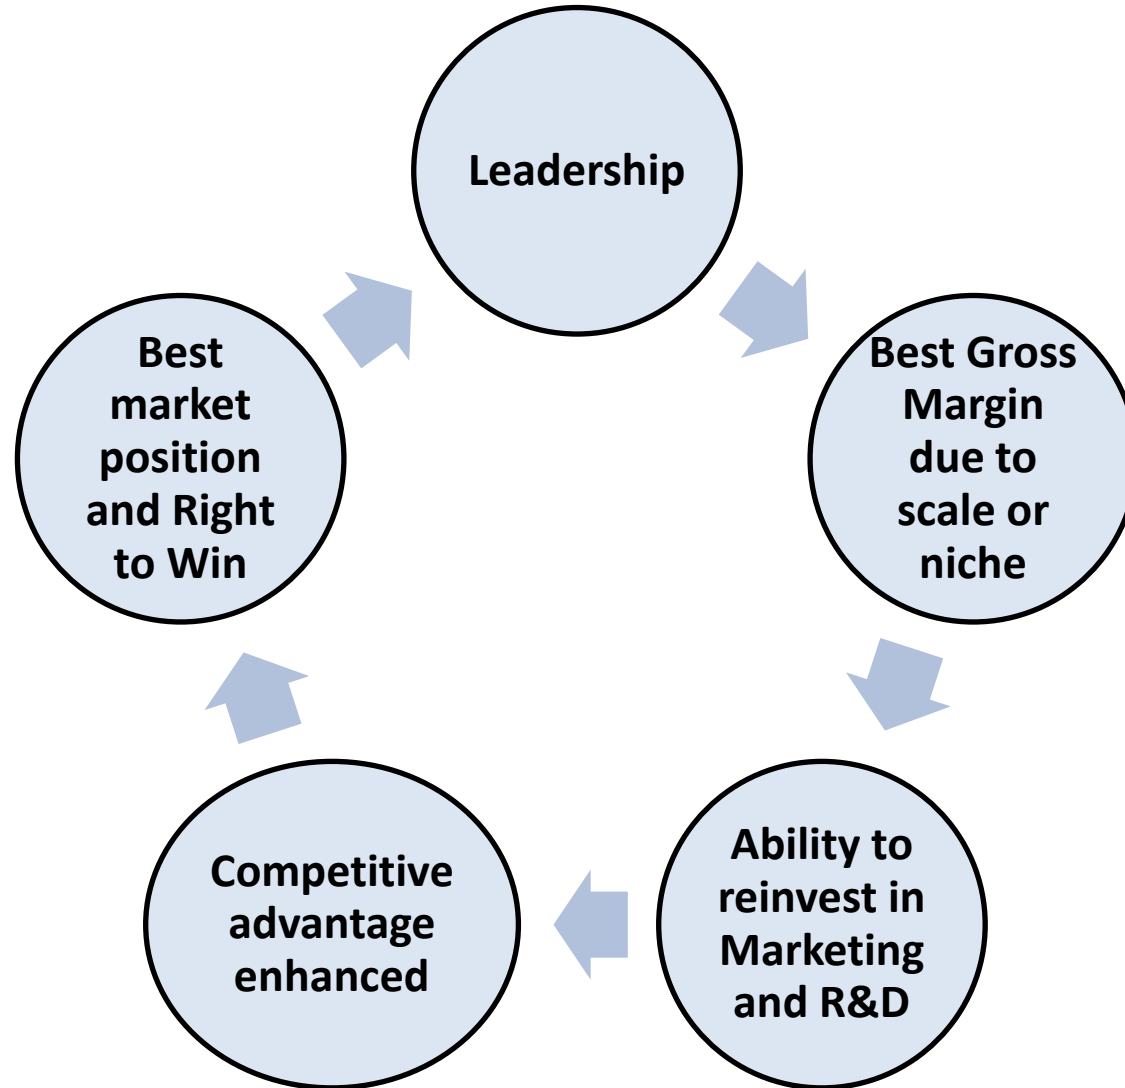

- Large addressable opportunity
- Industry with structural tail winds of growth

- Vision backed with granularity in thinking and “feet on the ground”
- Team depth beyond promoter
- Focus on few business lines
- Disciplined on Capital Allocation
- Prudent use of leverage

WE LOOK FOR COS. BENEFITTING FROM SECULAR TAIL WINDS OF GROWTH

	Secular decadal theme	Sub Theme	Portfolio names
1	Opportunity to gain market share in global supply chains: Manufacturing/Services	Precision Engg.	RACL
		Specialty Chemicals	Kama, Yasho, Neogen
		Technical Textiles	Garware Technical
2	Growth with industry consolidation of market share in India	Banks	ICICI, HDFC, Axis
		Cement	
3	Greater deployment of Financialization of savings in risk Assets in India	AMCs/Wealth Mgmt	
		Services to support AMCs	
4	Convenience	Quick Commerce	
5	Digital Business Models and enablers of Digital	Telecom	Bharti Airtel
		B2B Services	India MART
6	Govt efforts for mitigation of inequality	Affordable Housing	
7	Discretionary consumption – “Affordable luxury”	Jewellery	
		QSR	RBA
		Outbound tourism	
8	Clean energy transition	Battery Chemicals	Neogen
9	Solutions that drive productivity in US Healthcare		
10	Massive increase in grid electrification		
11	Explosive use of GLP 1 Drugs for Weight Loss	Injectable devices	Shaily Engineering
		APIs	

WE PREFER SECTOR LEADERS OR COS THAT DOMINATE A NICHE

WE AVOID COMPANIES EARNING AN UNFAIR/UNSUSTAINABLE MARGIN WHICH CAN PLUMMET

Examples where margins under attack at present	Examples where Margins will come under attack shortly
Paints	Wealth Management
Commodity Chemicals	Capital Goods e.g. Transformers

RED LINES

- <18% ROE on steady state economics, 15% for Banks.
- Promising stories but where steady state economics are not clear
- Deep cyclicals, unless available at very discounted prices
- Companies that lack focus resulting in mediocre positions in many business lines
- Companies where promoters take cues from stock prices
- Company with historical governance decisions that have impacted minority shareholders
- Companies very cheap but where we are not aligned with how promoters are building the business, or lack compounding
- High Debt burdens which threaten Equity holders interests

PORTFOLIO DESIGN BALANCES STABILITY WITH HIGH GROWTH PROSPECTS

Growth with Stability

- Leader, but more mature in growth life cycle
- Strong market position
- Robust business model and Balance Sheet
- Stable earnings growth

- 15% IRRs, high probability

- 35-50% allocation

Growth with Longevity

- Leader in growing market
- Early in growth life cycle
- Strong prospects for earnings growth

- 18-20% IRRs, long periods of time, medium probability

- 35-50% allocation

Growth with potential Asymmetric upsides

- Untracked companies with low liquidity
- Large opportunity + great leadership
- Potential for exponential earnings growth

- 25%+ IRRs, medium probability

- 30-40% allocation

EACH COMPANY HAS A ROLE IN THE PORTFOLIO

Examples

Growth with Stability

- HDFC Bank
- ICICI Bank
- Bharti Airtel
- Garware Technical Fibres

Growth with Longevity

- IndiaMART
- RBA
- Neogen Chemicals
- RACL Gear Tech

Growth with potential Asymmetric upsides

- Yasho Industries
- Kama Holdings

FAIR VALUE DEPENDS ON STAGE OF GROWTH LIFE CYCLE + ROE

HIGH VALUATION MULTIPLE CAN BE JUSTIFIED FOR COMPANIES VERY EARLY IN LIFE CYCLE

Basic thumb rule: approx fair 1 Yr Fwd PE		ROE								Cost of Equity 12%
		10%	12%	15%	20%	25%	30%	35%	40%	
Earnings growth for first 5 years	0%	8	8	9	9	9	10	10	10	
	10%	5	8	11	13	15	16	17	17	
	15%	3	8	12	17	20	21	23	24	
	20%	0	7	15	22	26	29	32	33	
	25%	-5	7	18	30	37	41	45	47	
	30%	-12	6	23	41	51	58	63	67	
	40%	-37	2	40	79	102	117	128	137	

Very few companies can compound earnings at 25% CAGR for long periods at 25%+ ROE.

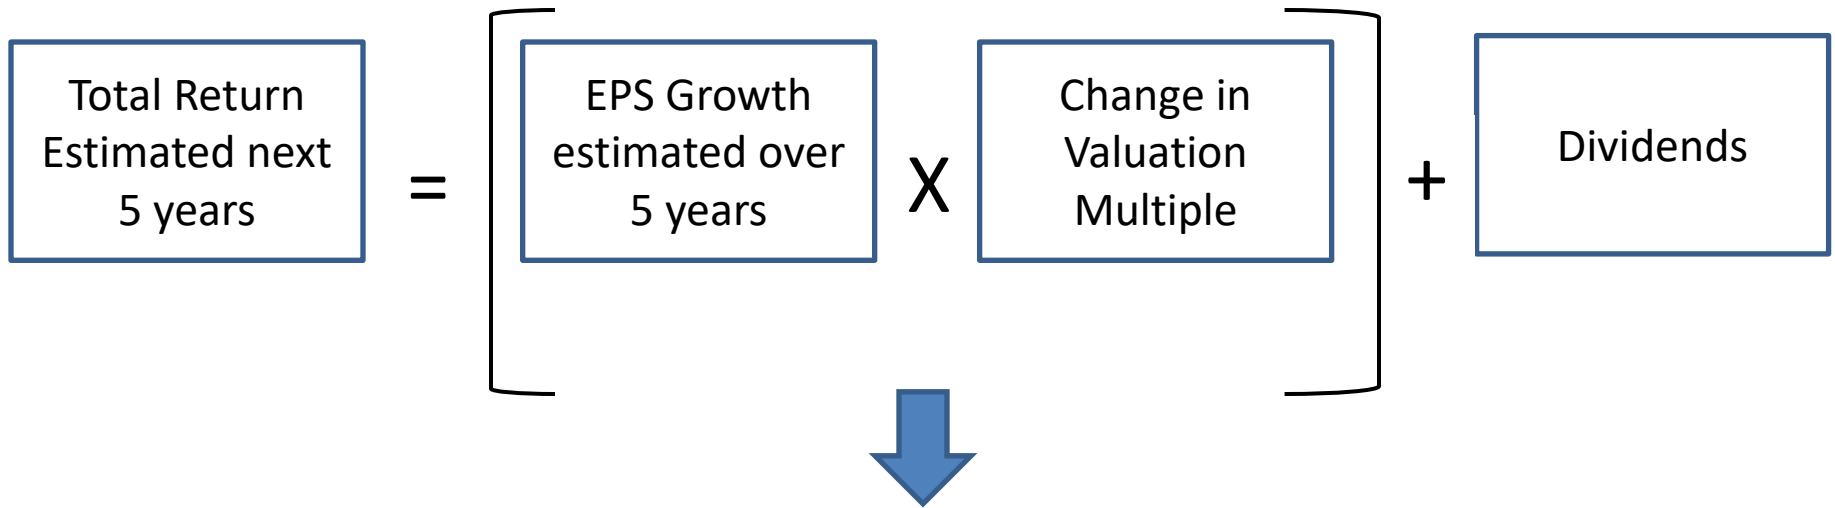

Hence, paying >40x PE is a rare exception for us.

However, quality is seldom cheap. Hence, nuance is critical.

POSITION SIZING: WHERE IS THE COMPANY ON ITS EVOLUTION ?

	Early 			Very evolved
Stage of company evolution	Promise. But no clear edge	Deepening foundations Widening the moat	De-risked business model Depth in leadership Resilience	Flywheel starts spinning.
Position sizing in aggregate	<10%	15-20%	40-50%	35-40%
Good liquidity	5%	5%	6-8%	10-12%
Poor liquidity	3%	3%	4-6%	8%

THE EXIT DECISION REQUIRES NUANCE BASIS EXPECTED IRR, OPTION VALUE AND LIQUIDITY

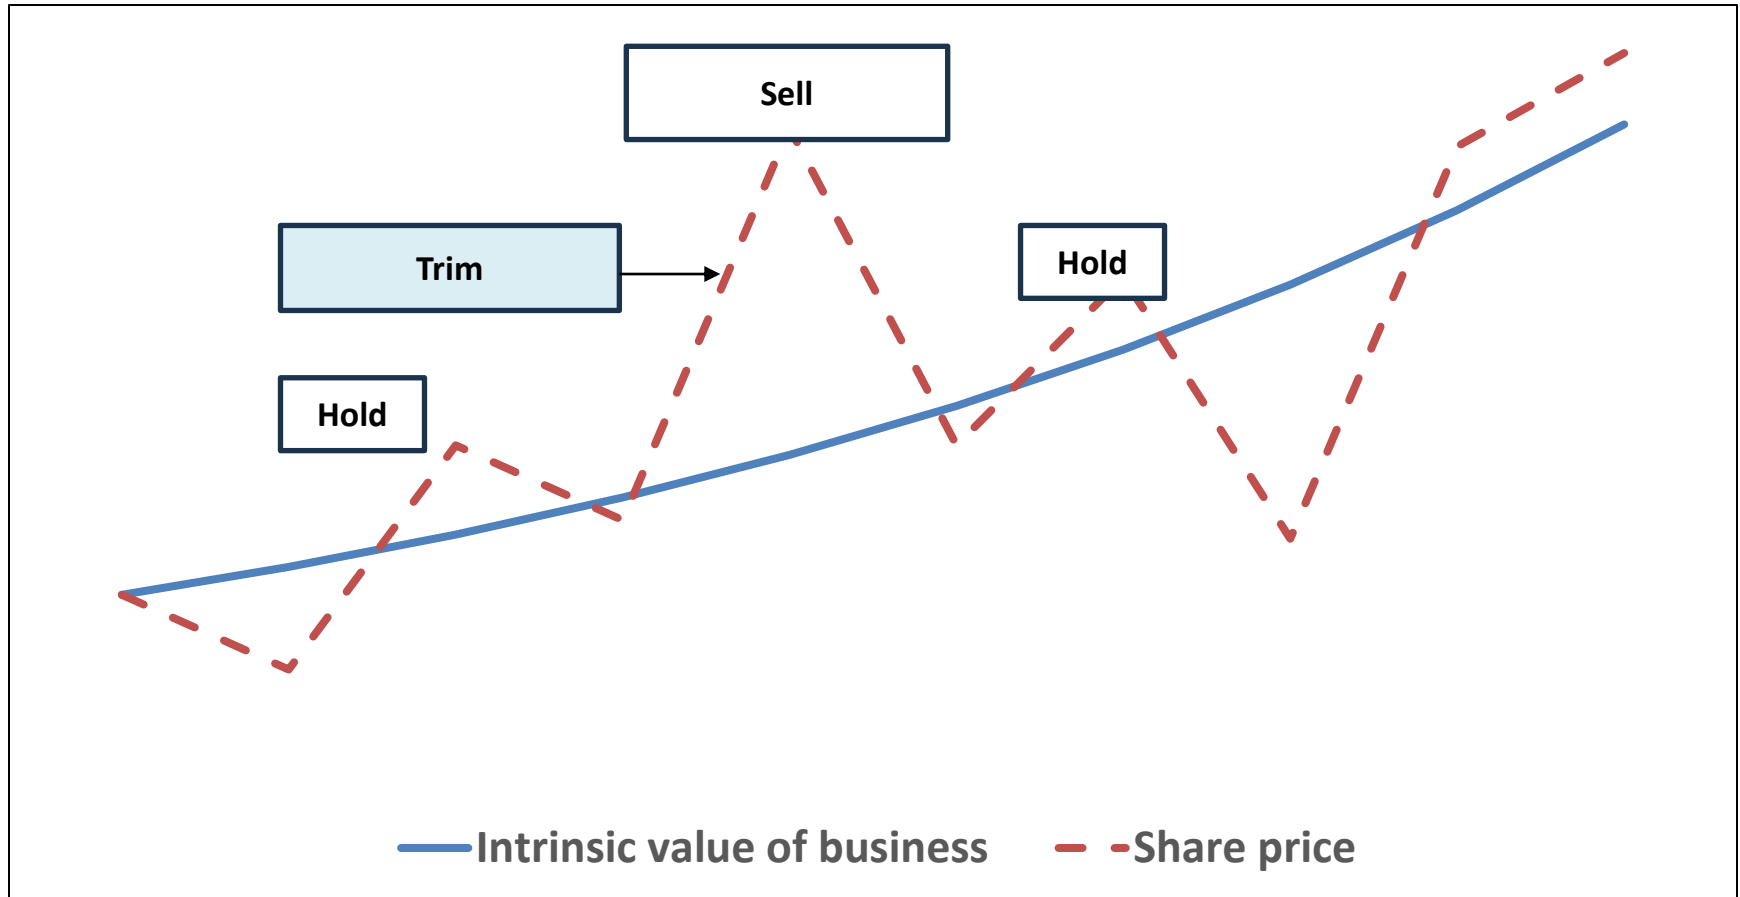

Can we see a path to 15% IRR over 5-10 years basis present business?

Is there visible Option value of new business lines that are hard to model/quantify?

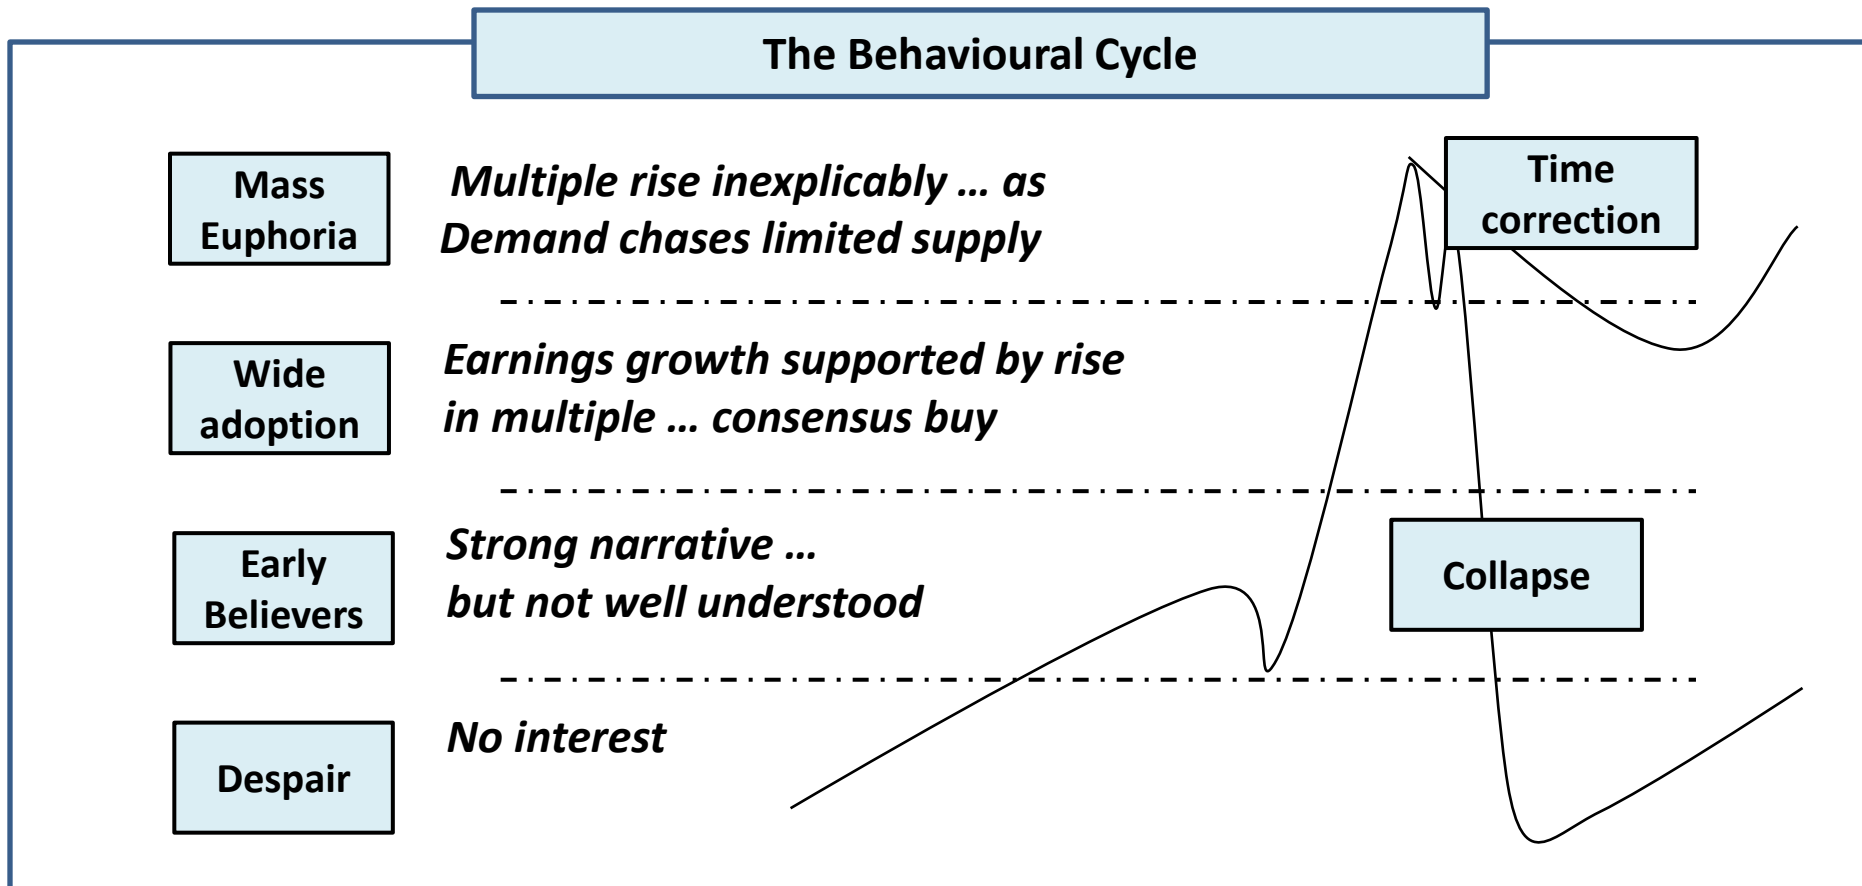

Will the market give us the liquidity to exit when we choose to?

Which decile would we grade these promoters?

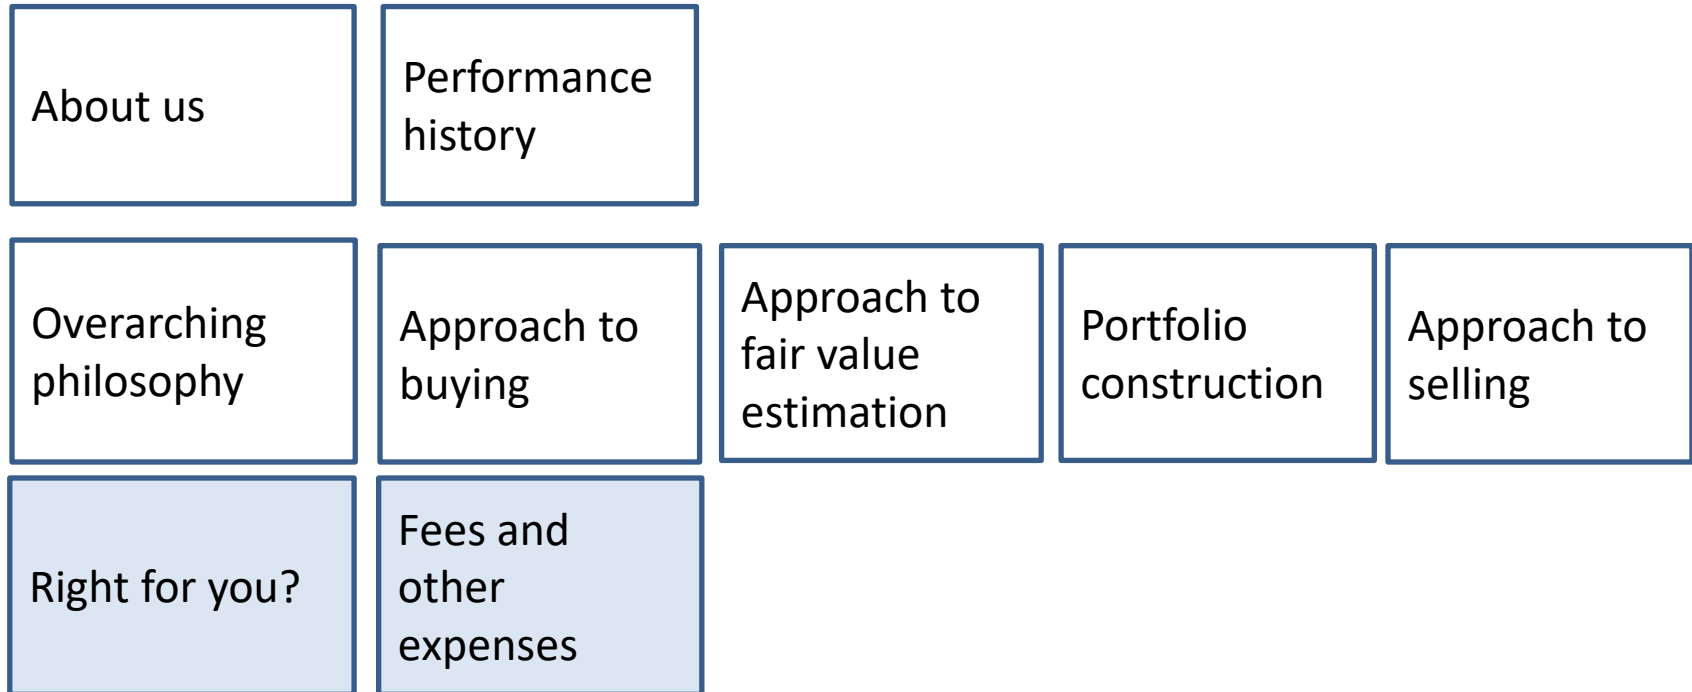

BIAS TO NOT EXIT QUICKLY AND RIDE WINNERS. WE TOLERATE SLIGHT OVERVALUATION FOR OUR COMPOUNDERS

BIAS TO START TRIMMING IF VALUATIONS ARE EUPHORIC

TOPICS

SUMMARY APPROACH

- Quality: *Ensures survival. Ensures we don't panic during market dislocations.*
- Time. *Think 5-10 years, not 1-3 years*
- Concentration. *15-20 best ideas*
- Valuation. *Price paid matters. However, for companies at inflection points, fair value is hard to determine. Don't be greedy for the first 3% weight.*
- Conviction. *Do not hug the Index*
- Use size to advantage. *Be willing to embrace some illiquidity*
- Discipline. *Stay true to process when things not working. Trust in mean reversion.*
- Exit: *No foolish loyalty, but high bar for churn due to valuations. No ego if we are wrong.*

WE HAVE TWO SCHEMES WITH SAME STRATEGY THAT DIFFER ON LIQUIDITY AND CONCENTRATION RISK

Market Cap (In crs)	Prudence (as of today)	Market Cap (In crs)	Emerging Leaders (new launch)
>100000	42%	>100000	
25000-100000	12%	25000-100000	
10000-25000	9%	10000-25000	
5000-10000	12%	5000-10000	20%
2500-5000	7%	2500-5000	80%
<2500	17%	<2500	
	100%		100%

Only for existing partners (closed at present for new inflows)

ARE WE RIGHT FOR YOU ?

Definition of success: 1.5% Alpha over BSE 500 TRI over 5 years. We expect to lag markets in a raging bull market. We will not compromise on governance to chase higher returns.

You must be willing to think 5 years at a minimum.

We will embrace some illiquidity. If you choose to withdraw prematurely, exit may be at discounted prices.

Minimum 2.5 Cr investment corpus per family.

A PMS has “time value of money” tax disadvantages over a MF. It has advantages of “control” – Boutique nature, customization, less stress during times of market turmoil.

FEE OPTIONS - PRUDENCE SCHEME

Principal infused		2.5 to 5 Cr	5 to 10 Cr	10 to 25 Cr	25 to 50 Cr
Fixed	On NAV	2%	1.75%	1.5%	1.25%
Semi Variable (profit share drawn after 3 yrs.)	Fixed fee on NAV	1%	1%	1%	1%
	Hurdle rate pre tax	12%	12%	12%	12%
	Profit share above hurdle rate	20%	17.5%	15%	12%
Variable (profit share drawn after 3 yrs.)	Fixed fee	0%	0%	0%	0%
	Hurdle rate pre-tax	8%	8%	8%	8%
	Profit share above hurdle rate	20%	20%	20%	17%
Brokerage/GST at actuals. Additional 2bps for Custody & Fund accounting Fixed fee is calculated on the basis of daily average AUM & charged quarterly					

FEE OPTION- EMERGING LEADERS SCHEME

Principal infused		2 Cr & above
Semi Variable (profit share drawn after 3 yrs)	Fixed fee on NAV	1%
	Hurdle rate pre tax	12.5%
	Profit share above hurdle rate	20%
Unlike Prudence, exit loads apply.		
Brokerage/GST at actuals. Additional 2bps for Custody & Fund accounting		
Fixed fee is calculated on the basis of daily average AUM & charged quarterly
